# TRIJICON GEN2 COMPACT ACOG®

**BATTERY-FREE ILLUMINATION**  
Most ACOG models feature a tritium / fiber optic illuminated reticle that automatically adjusts the brightness based on available light.

**RUGGED ALUMINUM-ALLOY HOUSING**  
Forged 7075-T6 aircraft-aluminum-alloy housing provides for a nearly indestructible sighting system.

**BOTH EYES OPEN DESIGN**  
The ACOG can be used as a CQB sight when shooting both eyes open utilizing the Bindon Aiming Concept.

**SUPERIOR QUALITY GLASS LENSES**  
Multi-coated lenses provide superior clarity and light gathering capabilities with zero distortion.

**FIXED MAGNIFICATION**  
Less moving parts than a variable optic equals more durability. Several magnifications available: 1.5x, 2x, and 3x.

**COMBAT PROVEN**  
No other magnified optic has been used more in combat than the ACOG.

**SHOCK-RESISTANT**  
Proven to withstand recoil from a .22LR to a .50BMG and everything in between. Easily passes U.S. Military drop test requirements.

**WATERPROOF TO 100 METERS (328 FT.)**  
Dry-nitrogen filled to eliminate fogging. Five times more waterproof than military standard requirements.

**LIMITED LIFETIME WARRANTY**  
Tritium lamp is warranted to illuminate for 15 years on fiber optic scopes and 10 years on non-fiber optic scopes.

## GEN2 ENHANCEMENTS INCLUDE:

Easy-to-use external adjusters are finger adjustable and feature a water-tight gasket for improved waterproofness when adjuster caps are off.

Adjuster cap lanyard assemblies, now a standard feature minimizing missing caps.

Reconfigured mounting base allows integration with full size and compact ACOG mounting adapters for increased flexibility of mount configurations.

Redesigned forged housing features a solid eyepiece for increased durability.
