Traditional iron sights are often ineffective in low-light situations, so we did something about that. Trijicon® iron sights excel in a wide range of lighting conditions (including low light) and are built with our legendary durability to handle whatever comes their way. Take advantage of superior technology for aiming solutions you can trust.
The Trijicon Bright & Tough™ Night Sights are a self-luminous, three-dot, night sight alternative to traditional iron sights. They are the first choice of major handgun manufacturers and standard issue with numerous local, state and federal law enforcement agencies.
