Trijicon MGRS® Mount

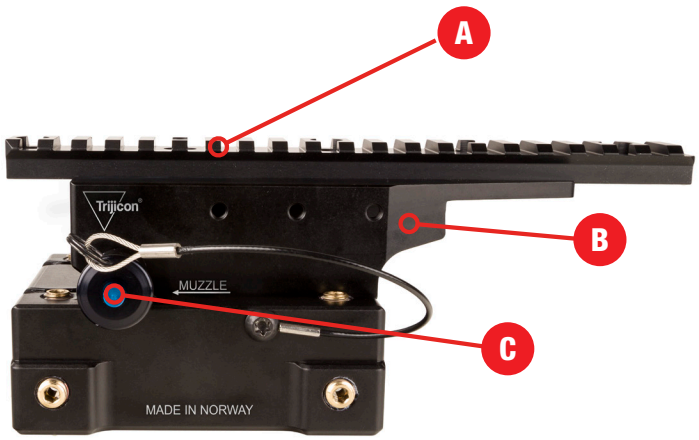

M2 Heavy Machine Gun Mount

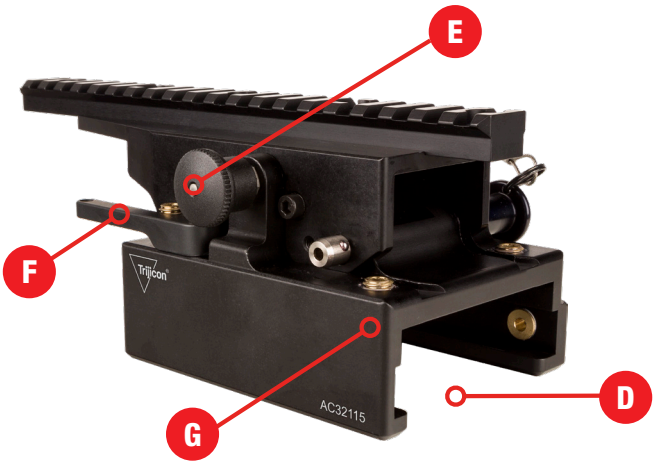

The MGRS® M2 Heavy Machine Gun Mount is designed to provide a rapid optical mounting solution for the M2 Heavy Machine Gun (HMG). Developed for the M2 .50 caliber (12.7mm) Heavy Machine Gun, the Mount provides a stable platform for the Trijicon MGRS during observation and firing. It has a see-thru tunnel under the Picatinny rail which provides access to the original iron sight as backup.

1. Designed for the Trijicon MGRS® with optional 3x Magnifier
2. Detachable rail system allows base to remain on weapons platform for easy detachment of MGRS and/or swapping of MGRS while remaining zeroed
3. Holds zero and offers return-to-zero after removal and remounting
4. Does not interfere with M2 HMG operations or maintenance, including charging handle, feed tray cover, and grips. The feed tray remains accessible while the MGRS is mounted
5. Low profile: low height above M2 HMG receiver
6. Allows mounting of other day/night optics that can be attached to 1913 Picatinny rails

Features and Benefits
